

inalyS URINALYSIS

Results in 4 Minutes

Results are ready almost as soon as voiding is complete.

Uroflowmetry and/or Urinalysis

No longer any need to request two separate samples from patients.

No Cups, No Transport

The sample is analyzed directly in the device.

Suitable for All Patient Populations

Easy sample collection for women, children, the elderly, and other special-needs patients.

No More In-hospital Circulation

No need to refer patients to other departments.

- ✓ Faster time to diagnosis.
- ✓ Reduced laboratory workload.
- ✓ Less reliance on support staff.

How It Works

- 1 Patient voids.
 - 2 The device performs uroflowmetry and/or urinalysis.
 - 3 The device self-cleans.
- Results are transmitted to the hospital system within 4–5 minutes.

Parameters

- Glucose
- Bilirubin
- Ketone
- Specific Gravity
- Blood
- pH
- Protein
- Urobilinogen
- Nitrite
- Leukocytes
